

Certificated GDP Training for Pharmaceutical and Life Science Products London, October 2-3 2017

IAG

In the international world of transporting and distributing temperature-sensitive pharmaceutical and life science products, compliance with Good Distribution Practice (GDP) regulation is essential. Revised EU guidance and other international rules also make it clear that all those involved in processing and handling these sensitive commodities must be properly trained. The UKMHRA also requires that forwarders and other providers must now hold a Wholesaler Dealer Authorisation.

IAG Cargo, through its Constant Climate service, is one of the worlds leading airline carriers of pharmaceutical and life science products and has invested heavily in facilities, processes and systems to meet GDP requirements and gained UK MHRA approved status. **Exelsius Ltd** has provided GDP certificated training to IAG Cargo staff for over 3 years and has also trained over 1300 students internationally.

Now in a unique collaboration, IAG Cargo and Exelsius have formed the **Good Distribution Practice Academy** and are able to offer this training to pharmaceutical manufacturers, logistic service providers, ground handlers and all others involved in the logistics process. Combine your classroom training in the correct handling of temperature sensitive pharmaceutical products, with a 'live' visit to the IAG Cargo Constant Climate Centre at Heathrow. Witness the handling processes used by IAG Cargo for its Constant Climate product and meet the operational team that handles pharmaceutical and life science shipments to Good Distribution Practice (GDP) standards.

Course Content Includes:

- An examination of the latest global GDP regulations such as EU 343/01, including
 - Quality Management Systems
 - Premises & Equipment
 - Documentation
 - Operations
 - Outsourced Activities
 - Transportation
- Mapping a typical supply chain and examining critical control points
- Understand Temperature control solutions – Active and Passive
- Quality Management Systems and audits
- Temperature Monitoring technology
- Service Level (Quality) Agreements and SOP's
- Understanding and using CAPA in the logistics process
- Examining the application of IATA Temperature Control Regulations
- The role of the Responsible Person

Course Benefits include:

- Gain an in-depth understanding of the world of international healthcare logistics
- Understand the application of international Good Distribution Practice (GDP) guidelines and the requirements of the UKMHRA WDA
- Experience an airport operational environment and witness airside procedures for IAG Constant Climate services
- Understand the essentials of Good Temperature Management and how to use Active and Passive transportation solutions
- Learn the essential aspects of SOP's in your working environment
- Understand how to mitigate risk in the temperature-sensitive supply chain
- Examine the GDP requirements of Transport Qualification in the pharmaceutical supply chain
- Understand the role of audits in the Quality Management process
- Understand the practical requirements of corrective processes (CAPA)

Certificated GDP Training for Pharmaceutical and Life Science Products London 2-3 October 2017

Course Date:

October 2-3, 2017

Venue: Hilton Hotel Terminal 5,
London Heathrow Airport

Pricing and Registration:

Price per student for the two-day course GBP 660.00

Price includes lunch and refreshments on all course days and one dinner sponsored by IAG Cargo on October 2.

Special rates will be negotiated with the course venue hotel for those students requiring accommodation. Please contact the Hilton Hotel for further details.

To register:

Download the course registration form from the Exelsius website www.exelsiusglobal.com or email GDPAcademy@exelsiusglobal.com. Return the form at least 14 days in advance and ensure your payment is made in order to receive confirmation of your course place and joining information. Further details are available on the registration form.

Terms and Conditions:

Booking: For airport airside security reasons, name substitutions may only be made up to 14 days in advance of course dates. Payment must be received in full at least 14 days in advance.

Cancellation: Bookings cancelled less than 14 days before a confirmed course date will not be eligible for a refund as airside security passes are not transferrable.

This course is also available on an exclusive-company basis that will maximise your team's effectiveness. Please contact GDPAcademy@exelsiusglobal.com or call +44 1420 520498 for further details.
